

Automated Controls

Project Engineering Intern – Automated Controls, Redmond, WA

Posting#:H20-002

Automated Controls is a leader in the Pacific Northwest for open-protocol and custom developed Building Automation and Industrial Control systems. We thrive in a casual but dynamic work environment where employees explore the possibilities above and beyond a job description.

We are seeking an electrical engineering intern for 2020 to work with our Industrial Controls team.

In this position, your duties will entail:

- Mechanical and electrical circuit design and review assistance
- Control system design and review assistance
- Preparation of proposals and review of plans and specifications
- Check performance and conformity with plans and specifications through field inspection and testing
- Assist with the preparation of technical memoranda, reports and electronic deliverables
- Field activities such as site investigations and observations
- Collect and record data and generate documentation

Preferred Qualifications

- Strong written and oral communication skills
- Completed coursework in controls or control systems
- Independent and team projects in mechanical design, electrical circuit design, and/or robotics
- Experience with CAD; AutoCAD, SolidWorks, or equivalent
- Experience with the Microsoft Office suite of products including Outlook, Word and Excel
- Ideal candidates should be pursuing, or completing, a Bachelor's degree in Mechanical Engineering, Electrical Engineering, or related fields.

Email a cover letter and resume to careers@automatedbcs.com. Include the posting # in the subject line of your email.
